

THE FIRE WITHIN OUR SCHOOL

In halls where laughter paints the air,
A spark of courage grow right there,
Each locker hides a dream untold,
A story waiting to unfold.

The blackboard whispers, "Dare to try,"
The playground cheers beneath the sky.
From timid steps to fearless leaps,
In school, we sow what future reaps.

No test too tough, no goal too far,
Each class a step to be a star.
With friends beside, with heart ablaze,
We light the world through school's bright day

So stand up tall, let doubt unwind,
Your school's the forge for dream designed,
Ignite your life's fire,
let brilliance bloom, This is your time-
make magic room.

Keshav Kumar Gupta, Class - XI

SANSKAR BHARTI "GLOBAL SCHOOL"

Sanskar Bharti Global stands tall and bright.
A temple of learning, glowing with light.
Books and libraries whisper and gleam,
Filling young minds with knowledge and dream

Science labs sparkle with wonders unfold,
Curiosity shines brighter than gold.
The computer labs hums with keys and code
Where future inventors walk that road.

A playground so vast, under skies so blue
Echoes with laughter, fresh and true.
Teachers like candles, gentle and kind,
lighting each spark in every mind.

Discipline, respect and care are the rule,
That's the spirit of our dear school.
Sanskar Bharti Global, proud and grand
A world of wisdom, heart and hand

Aryan Goit, Class - IX

SOME FACTS

1. Mercury is a shiny silvery metal that is used in the making of thermometers. It is the only metal that is liquid at room temperature.
2. Moon flowers are a variety of plants that get their name because their flowers bloom only at night. They are pollinated by night-flying insects like the hawk moth.
3. The shortest war in the history of the world called the Anglo-Zanzibar war over in less than an hour. This military conflict was fought between the British Empire and the Zanzibar sultanate, an island in East Africa.
4. The sailfish, with its sail-like dorsal fin is one of the fastest fishes in the world.
5. Coffee is one of the most refreshing beverages. It comes from the coffee plant that sprouts cherry-like fruits, inside which is the bean. Brazil is the world's largest producer of coffee.
6. All octopi, spiders and snails have blue-coloured blood. Their blood does not contain hemoglobin but hemocyanin and hemocyanin absorbs all colours except blue which it reflects.
7. "Mobbing" is a kind of behaviour where small birds give out alarm calls and chase or fly at large birds. They do it to keep them away from their nests, a food source, or their young ones.
