

“ARTIFICIAL INTELLIGENCE SHAPING TOMMOROW’S WORLD TODAY”

- The Dawn of Intelligent Machines.
- Artificial Intelligence (AI) represents one of humanity’s most ground breaking technological achievements. At its core, AI enables solving complex problems, machines to stimulate human intelligence (like humanoid robots) recognizing patterns and in making informed and smart decision.
- Once which existed solely in science fiction has now become an integral part of human everyday life.
- ‘AI’ in Our Daily Lives.
- The influence of AI permeates virtually every aspect of modern life. When we ask voice assistants like Siri or Alexa for weather, or GPS navigation to find smooth routes and use e-commerce platforms like Amazon all these utilize AI algorithms to analyze our browsing pattern.
- In Education, AI- powered adaptive learning platforms customize content based on individual student strengths and weakness, creating personalized learning experiences that enhance academic outcomes.
- Transforming Industries and Society.
- “AI’s impact extends far beyond consumer convenience”. In health care, AI systems analyze vast amounts of medical data to assist doctors in early disease detection, accelerate drug discovery processes and develop personalized treatment plans.

The automative industry has utilize AI, through autonomous vehicles, that can navigate roads, avoid collisions and provide real time traffic updates.

- The road ahead and embracing responsible innovation.
- As we progress through 2025, AI models are becoming more sophisticated and capable. Advanced reasoning capabilities now allow AI systems to solve complex problems using logical steps similar to human thought processes.
- The future belongs to those who understand that AI is not meant to replace human intelligence but to argument it, creating unprecedented opportunities for collaboration between humans and Machines. As student and future leaders understanding AI’s capabilities and implications will be crucial for navigating tomorrow’s world, because, age of AI’ is not “approaching it is here” and it is reshaping our world in says, we are only beginning to comprehend.

Amrita Kumari, Class - XI

पढ़ना-लिखना

पढ़ना-लिखना बोज़ नहीं है,
हमने यह पहचान लिया।
धरती, अंबर, नदियाँ, झरने,
सब अपने हैं, जान लिया।
ओस की बूँदे, सुबह की लाली।
फूलों का हौले-से खिलना
इन्द्रधनुष के रंग बिखेरना
सागर में लहरों का उठना
दरियाओं का बहते जाना
मिट्टी से अंकुर का उगना
अंकुर से जंगल बन जाना
इनका आपस में रिश्ता है
हमने यह पहचान लिया।

Manvi Kumari, Class - VIII
